GET STARTED, FASTER!

YOU ASKED
if we could do anything to make the slow-starting computers faster.

WE LISTENED
and removed some of the larger programs from most of the computers in the library.

NEED GIS-CAD?
The GIS-CAD software is still available on approximately 50 computers. Flip over to see all locations.

The library computers are now set up in two ways:

**STANDARD**
You asked, we listened!
Robert E. Kennedy Library

Standard PCs
have the usual stuff.

**GIS-CAD**
You asked, we listened!
Robert E. Kennedy Library

GIS-CAD PCs
have much more software, including AutoCAD, ArcGIS and Solidworks.

We made the change so that when you just need standard PC software, you can get started, faster!

Scan to get the full software list and find PC locations: bit.ly/VuynLr
